

Broadband Solutions

A Best-In-Class Cooperative Approach to Planning, Building and Managing Your Network

What can NRTC Broadband Solutions do for you?

Feasibility Studies

NRTC Broadband's team of experts will help you make thoughtful and well-informed decisions when pursuing the creation of your broadband business.

Funding

Expert assistance to navigate the complexities of federal and state funding programs, including: Grant readiness, Opportunity analysis, Grant preparation, Mapping and validation, and Professional review.

Design

Our time-tested approach strikes the balance between a standardized, highly scalable process and one that incorporates the unique needs of your community. Expect a highly collaborative experience where we work together to design a network that offers the best value for your total cost of ownership.

Network Engineering

Every network is different and so are our solutions. As a co-operative, we do far more than design and build networks; we partner with our members to build lasting infrastructure that enables rural communities to grow and thrive.

Project Management

Our Project Management team is committed to ensuring your business is designed to meet the unique needs of you and your community for generations to come. We manage all the details so you don't have to.

Construction Management

Building a broadband network is a complicated undertaking and the challenges can quickly add up after construction begins. Our Construction Management team is at your side from beginning to end.

Procurement

The community you serve matters—to you and to us. When it comes to acquiring the necessary materials to build and maintain your network, our Procurement team leverages their knowledge, experience, scale and long-standing relationships with key suppliers to ensure you're well taken care of.

Broadband Solutions

A Best-In-Class Cooperative Approach to Planning, Building and Managing Your Network

What can NRTC Broadband Solutions do for you?

Mapping & Marketing/Sales Automation

With NRTC's CrowdFiber platform, you can: Ensure members see an accurate list of services available to their home or business address. Watch interest grow in neighborhoods you didn't expect and maximize your ROI. Present your company the way you want. Automatically create upsell opportunities with your full portfolio of offerings. Streamline your broadband reporting processes. Even research areas for future funding opportunities.

Bundling with Mobile & Video Services

Bundling your broadband services with mobile and video can make your subscribers "stickier" and less likely to leave. NRTC offers complete MVNO support, all the latest devices, and affordable mobile plans on America's most reliable 5G network. And our variety of streaming services can help you meet your members' ever-changing appetite for content.

Why Choose NRTC?

Enter into a full broadband business engagement

A broadband network is an enormous investment that shouldn't be made lightly. We work closely with you to fully understand the circumstances that make your situation unique.

Develop the community infrastructure plan that's right for you

There's no such thing as a "one size fits all solution" when it comes to deploying a broadband network. You deserve the network that's right for you—and your community.

Explore *all* your options

We don't have a specific network solution we're trying to sell—we help you explore all available options to understand the potential impacts each one can have on your business.

Drill down to the specific details

The industry-recognized feasibility study we provide is detailed and specific, allowing you to understand and clearly articulate why every decision is made.

Trust who you're working with

Our cooperative structure and values ensure we're not motivated by profit. We offer unbiased and expert guidance focused only on ensuring your long-term success.

For more information about how NRTC's broadband solution can help your cooperative, contact your Regional Business Manager or call 1-800-214-6782 (press 4).
